Business Context & Objective

Understanding growth, customer experience, and retention opportunities

Business Challenge

Customer and MRR (*Monthly Recurring Revenue*) continue to grow, but growth momentum is gradually slowing.

At the same time, customer experience and churn need to be understood to identify opportunities for stronger retention.

Analysis Objective

Identify actionable opportunities to improve customer retention and support sustainable business growth.

Analyze customer, revenue, network experience, and churn patterns to uncover key drivers of customer value and retention.

01
Customer Value
Growing customer base and revenue

02
Network Experience
Uneven network experience

03
Customer Retention
Understanding churn patterns & drivers

Disclaimer! The data provided is a synthetic representation created for educational purposes. It does not represent actual Telkom Indonesia customer data, operational performance, financial information, or business conditions. Any similarities to real-world situations are purely coincidental.

Business Questions & Methodology

From customer data to actionable business insights

Business Questions

01 Customer & MRR
How are customer base and MRR performing over time?

02 Customer Value
Which packages contribute most to customer and revenue value?

03 Network Experience
How does network experience vary across districts?

04 Customer Retention
Which contract types show higher churn, and what are the leading recorded churn reasons?

Methodology

Data Understanding
Review customer, subscription, billing, usage, network, complaint, and churn data.

Data Quality
Validate completeness, consistency, duplicates, and data relationships.

Data Preparation
Clean and transform data for analysis.

Analysis & Visualization
Explore customer, revenue, network, and churn patterns.

Insights & Recommendations
Translate findings into actionable business opportunities.

Customer & MRR Growth

Customer base and MRR continue to grow, but growth momentum is gradually slowing

Total Customers

20K

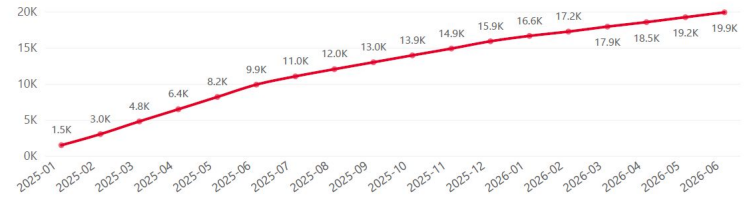

MRR

Rp5.17B

ARPU

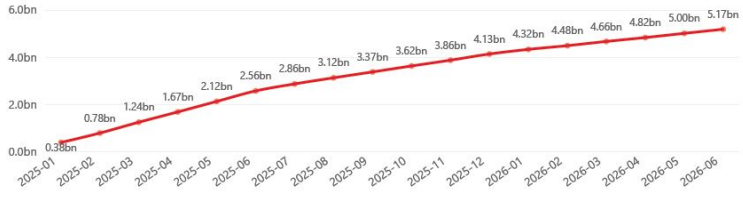

Rp260.0K

Active Customer Trend

Customer base continues to expand, showing sustained growth throughout the observation period.

MRR Trend

MRR continues to grow, maintaining a positive upward trend throughout the observation period.

Key Insights

01 Customer and MRR continue to grow
Both metrics show a positive upward trend.

02 Growth momentum is gradually slowing
Recent growth is lower than in earlier periods.

03 ARPU remains relatively stable
Monthly ARPU stays around Rp260K.

Disclaimer! The data provided is a synthetic representation created for educational purposes. It does not represent actual Telkom Indonesia customer data, operational performance, financial information, or business conditions. Any similarities to real-world situations are purely coincidental.

Customer Value & Package

Higher-speed packages generate higher revenue per customer

Key Insights

01 **50 Mbps has the largest customer base**
8.6K customers contribute Rp22B in total billing.

02 **Higher-speed packages generate higher value per customer**
Revenue per customer increases with package speed.

03 **50 Mbps drives the largest revenue contribution**
It contributes 38.3% of total revenue.

Network & Customer Experience

Network experience varies across districts, with network issues dominating complaints

Network Quality Score

81.7

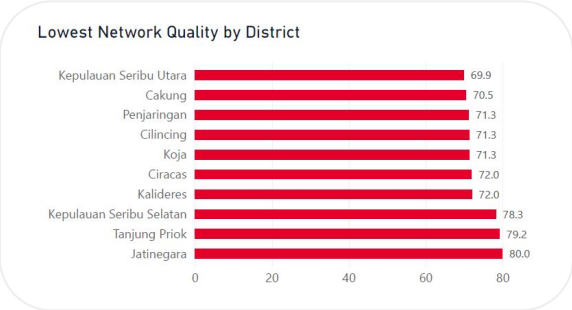

Average Downtime

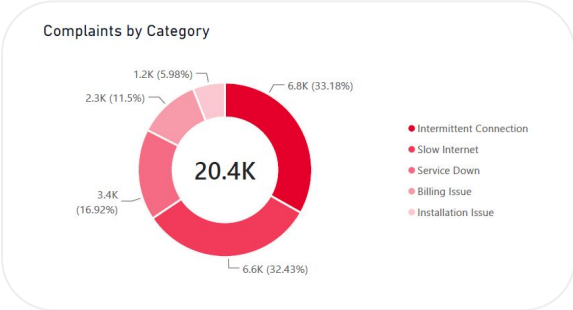

3.2 hrs

per customer-month

Total Complaints

20.4K

Key Insights

01 **Network quality varies across districts**
Quality ranges from **69.9 to 95.0**.

02 **Network issues dominate complaints**
Intermittent connection and slow internet account for **65.61%**.

03 **Complaint customers report moderate satisfaction**
Satisfaction among complaint customers is **3.1/5**.

Customer Retention & Churn

Churn varies by contract type and district, with network quality as the leading recorded reason

Retention Rate

90.0%

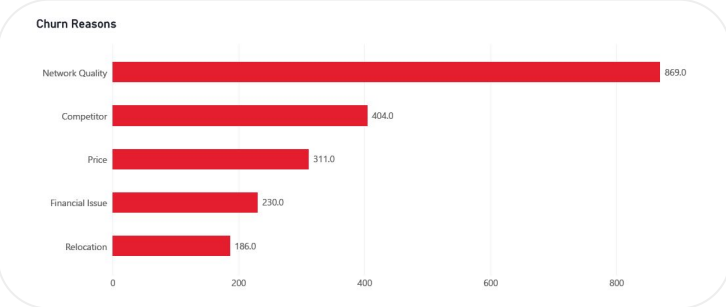

Churned Customers

2.0K

Overall Churn Rate

10.0%

Key Insights

01 **Monthly contracts have the highest churn**
11.5% churn rate.

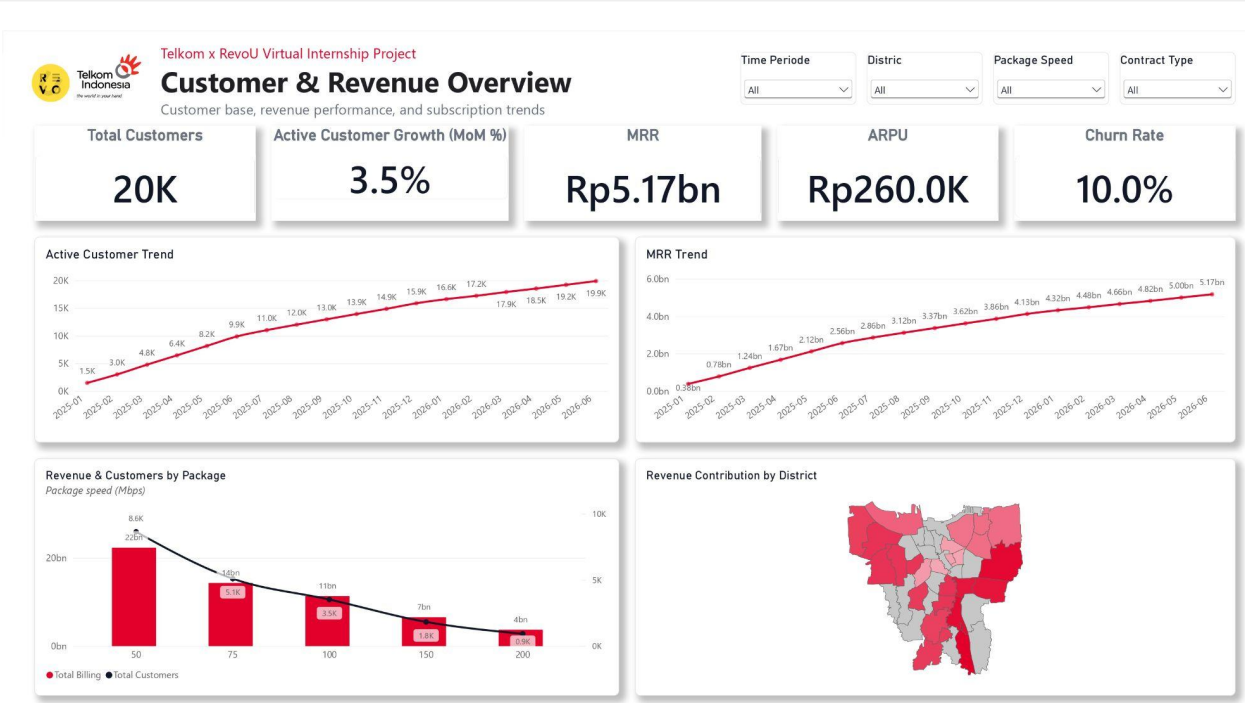

02 **Network quality is the top churn reason**
43.45% of churned customers.

03 **Churn is higher in selected districts**
Several districts show elevated churn.

Recommendations

Prioritize retention while creating targeted opportunities for growth

High Priority

Strengthen Network Experience

Prioritize Cakung, Penjaringan, Cilincing, and Koja for network monitoring.

Why this matters:
Elevated churn and complaint intensity.

High Priority

Improve Monthly-Contract Retention

Target monthly-contract customers, especially in high-churn districts.

Why this matters:
Monthly churn is highest at **11.5%**.

Growth Opportunity

Explore Selective Package Migration

Identify customers with potential for higher-speed packages.

Why this matters:
Higher-speed packages generate more revenue per customer.

Prioritize network experience and monthly-contract retention as immediate actions, with selective package migration as a growth opportunity.

Key Takeaways

From customer insights to sustainable business value

Growth

Customer & MRR continue to grow

The customer base and MRR show positive growth, although momentum is gradually slowing.

Experience

Customer experience needs attention

Network quality varies across districts, while network issues dominate complaints.

Retention

Retention is the key opportunity

Monthly contracts show the highest churn, making them a key focus for retention efforts.

Turn customer growth into sustainable value through better experience and stronger retention.
